- Marketing Strategy | SSM | SEO | Analytics | Content Marketing | Marketing Automation
- Linux | DevOps | Kubernetes | Virtualization
- SQL | NoSQL | ORM | ElasticSearch
- OpenCV | Neural Networks | Machine Learning

SUMMARY/OBJECTIVE

I love to study. It is my real passion. Give me a project that I have never had and I will have it done.

But I believe that a great thing can't be built alone but by being a well organized team.

WORK EXPERIENCE

CEO

Angara Digital | **Moscow** | **2007 – 2022**

- Besides the executive duties I led and took part in one of the company projects on the intersection of digital marketing, software development and machine learning. It was an automatic, pseudo intellectual system that was managing inventory. The stack was: microservices architecture, python, typescript, react, vue, elasticsearch, graphql, django, postgresql, REST API.
  In a nutshell - humans only created a list of products for testing and system made ads for each product, then based on performance of this product, the system was forming a very effective inventory matrix.
  As a result inventory turnaround reduced by 400%, profitability increased by 143%. ROI increased by 137%.

MARKETING DIRECTOR

Angara Digital | **Moscow** | **2015 – 2018**

- Led startup - Digital Marketing & Software Developing Agency. Organized all business processes such as sales, marketing, software developing, CRM.
- In half a year the agency gets revenue of $300k a month.
